Summary

Full Stack Engineer with 2 years of experience specializing in end-to-end application development, deployment, and complex problem-solving. Proven ability to architect scalable solutions, optimize system performance, and rapidly adapt to emerging technologies. Expert across the entire development lifecycle with a track record of delivering innovative solutions that drive business growth in fast-paced environments.

Skills

Languages: C#, JavaScript, Python

Technologies: ASP.NET Core, EF Core, React.js, Angular, MediatR, LINQ, Node.js

Databases: PostgreSQL, MongoDB, My SQL

Soft Skills: Collaboration, Leadership, Communication, Problem Solving, Adaptability

Experience

Software Engineer, VaporVM – Lahore, Pakistan

Jan 2025 – Present

- Architected and delivered an enterprise IT Asset Management (ITAM) system for multi-tenant asset tracking and lifecycle management using .NET Core, React.js, PostgreSQL, and MongoDB.
- Designed and optimized RESTful APIs, enabling export of 2,000+ assets per operation via ClosedXML and improving average response times by 40%.
- Implemented Role-Based Access Control (RBAC) with claims-based authorization to provide module- and tenant-level permissions.
- Built an expiry-notification service with Hangfire for scheduled and recurring reminders, improving on-time renewals.
- Enhanced bulk asset upload with row-level validation, error reporting, and data parsing, reducing upload failures by 70%.
- Integrated AWS S3 for tenant-specific logo/file management to improve scalability and uptime.
- Enhanced code maintainability and deployment workflows, enabling faster iteration cycles and long-term stability.
- Improved application performance by 30% through efficient front-end and back-end optimization strategies.
- Ensured quality with unit, integration, and performance testing; collaborated in Agile sprints and performed code reviews.

Associate Software Engineer, VentureDive – Lahore, Pakistan

Jun 2025 – Jan 2025

- Developed and maintained backend APIs using ASP.NET Core and Entity Framework Core, following Clean Architecture and SOLID principles.
- Designed and implemented backend services using Python (FastAPI), handling database schema design, query optimization, and scalable API development.
- Built responsive frontend components using React.js and Next.js, integrating with RESTful APIs for seamless data flow.
- Worked with SQL Server and PostgreSQL databases for designing schemas, writing optimized queries, and managing migrations.
- Created RESTful APIs with Node.js and Express, integrating frontend-backend communication with a focus on data security via HTTPS and API keys.
- Implemented state management using Redux and developed reusable, modular frontend code using JavaScript, CSS, and HTML.

- Conducted unit and integration testing to ensure code quality and reliability across multiple modules.
- Collaborated with cross-functional teams in Agile sprints, participating in code reviews and sprint planning.

Full Stack Developer Intern, INTERNNCRAFT – Lahore, Pakistan

Feb 2024 – April 2024

- Gained hands-on experience in full-stack development using **.NET Core**, React.js, and MongoDB.
- Successfully completed two comprehensive web design and development projects, applying clean architecture and responsive UI principles.
- Integrated and optimized API endpoints, reducing latency in data retrieval and improving performance on key pages.
- Developed and optimized robust back-end solutions in .NET Core to support seamless application functionality.

Education

FAST NUCES, BS in Computer Science

Aug 2020 – Dec 2024

Projects

Property Management System

- Built a full-stack property management platform with **.NET Core** (backend) and **React.js** (frontend) including property listings, tenant management, and payment integration.
- Tools Used: .NET Core, React.js, PostgreSQL.

RareFinds — Blockchain Marketplace (Final Year Project)

GitHub Repo

- Developed a blockchain-based auction marketplace using smart contracts and escrow-based payments to ensure secure, transparent transactions.
- Tools Used: React.js, React Native, Solidity, Web3.js.

Healthcare E-Commerce Website

- Built an e-commerce platform for healthcare products with personalized diet plans.
- Tools Used: React.js, Node.js, Express.js, MongoDB.

Certifications

- CSS, JavaScript, and Python Complete Course (Udemy)
- Git: Become an Expert in Git & GitHub (Udemy)

Languages

English: Proficient, **Urdu:** Native Speaker
